

N Scale Terraced houses

Thanks for purchasing one of my kits,
This kit just requires glue and scissors.

Cut out and glue the windows and doors in to position, The top run of windows is one strip. Please make sure they are glued to the correct side, The top run of windows only fit one way so hold them in place before glueing.

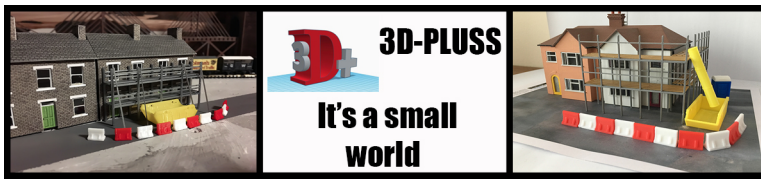

Find the two plain large gable ends and glue the walls as shown, Don't worry about the out side seam as these will be covered later. Do both ends.

You will have 5 oblong plain pieces of card, two of one size and three of the other, use the two slightly smaller ones and glue one each end as shown, these will support the floor.

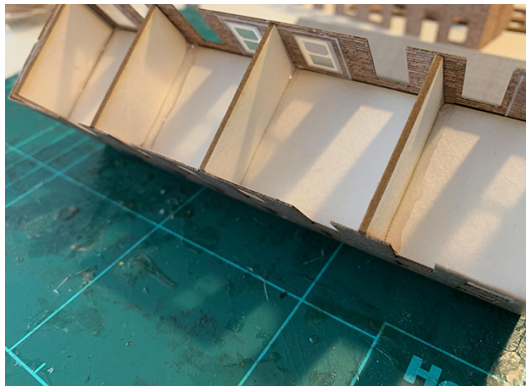

Run a line of glue on top of the supports you just fixed in, then insert the floor, don't worry if it bends slightly, that will be sorted shortly.

N Scale Terraced houses

Thanks for purchasing one of my kits,
This kit just requires glue and scissors.

Using the three other oblong plain pieces glue them on the bottom floor as shown, they can go anywhere you like.

And the same with the top floor dividers, please note the house pictured is missing the doors.

Using the 5 gables run a line of glue on each and fix the roof on, then the chimneys.

Hope you enjoyed building it, any feedback is greatly received.
