

N Scale Bus Station

Thanks for purchasing one of my kits,
This kit just requires Gel glue. Please keep all
parts away from children

A non super glue Gel glue is recommended

Firstly glue all the card brick panels
to the plastic walls shown left, then
the windows shown right.

Starting with the waiting room glue
the panels as shown left making sure
the window section is inbetween the
the gable walls, then assemble the
main building, again with the ends
on the inside.

now glue the waiting room roof on, the best thing
about using a Gel glue it will give you wiggle room to
get things square, the main roof is in 3 parts, 2x ends
and 1x centre.

Whilst that is drying use a black
markerpen and colour the white side
as shownleft, the using the crease
line fold.

Now glue them underneath to join the roofs.
